OBJECTIVE

Passionate front-end developer skilled in HTML, CSS, JavaScript and the React library, with a focus on responsive design. Eager to solve problems and build user-centered applications. Seeking an entry-level role to contribute to innovative projects and advance my skills in a dynamic team environment.

PROJECTS

- **DSAS A Secure Data Sharing and Authorised Searchable Framework for E-Health Care System**

  Feb 2024 - Jun 2024

  Technologies : **JSP as programming language and MySQL as database**

  - Secured remote monitoring of Personal Healthcare Records (PHRs) with AES encryption, granting exclusive access to authorized entities and ensuring privacy for patients.

- **Food Donation Management System**   **Oct 2023 - Dec 2023**

  Technologies : **PHP as programming language and MySQL as database**

  - A platform connecting food donors with NGOs to facilitate food donations, reducing waste and supporting food security

---

INTERNSHIP

Web Development (using HTML, CSS and JavaScript)   **Sep 2024 – Oct 2024**

- **Task-1: ToDo Application**

Developed a feature-rich todo application with add edit and delete functionality, text formatting options, and task completion tracking. Implemented dynamic progress counter and visual indicators to enhance user interaction and task organization.

- **Task-2: eMedical Application**

Developed an eMedical application enabling users to purchase a range of medical products, including medicines, Ayurvedic items, and personal care supplies, providing a comprehensive platform for essential healthcare needs.
